
Adobe InDesign Level 2

Course Content

In Adobe InDesign Level 1 you were introduced to the many features that help you create professional looking documents. Now you need to create much lengthier interactive documents that need to be accessed across a range of devices. In this course, you will learn advanced InDesign techniques to enhance the look and functionality of your documents.

Using Adobe InDesign, you can create interactive documents and export them for viewing in a web browser with various features such as buttons, page transitions, movies and audio files, hyperlinks and animation. You have the ability to assign color profiles and establish print presets. In creating longer documents, you'll be able to include such features as a table of contents, footnotes, cross-references and an index.

This course is intended for students who want to expand their entry-level knowledge of Adobe InDesign by using advanced features and collaboration tools.

Lessons include the following:

- Creating Documents for Multiple Formats
 - Build Layout Variations
 - Link Content
- Managing Advanced Page Elements
 - Create Repeating Content
 - Work with Text Layouts
 - Create Transparency
 - Use Anchored Objects
