

Certified Information Privacy Professional (CIPP/E)

Course Length: 2 days

Course Overview

European Data Protection covers essential pan-European laws and regulations, as well as industry- standard best practices for corporate compliance. Those taking this course will gain an understanding of the European model for privacy enforcement, key privacy terminology and practical concepts concerning the protection of personal data and trans-border data flows. IAPP training can provide your staff with the knowledge they need to help you meet your privacy program goals of reduced risk, improved compliance, enhanced brand loyalty and more. The IAPP offers privacy and data protection training programs specifically designed to extend that knowledge to those on your team requiring a solid understanding of privacy principles and practices.

Course Outline

1 - Data Protection Laws

- Introduces key European data protection laws and regulatory bodies, describing the evolution toward a harmonized legislative framework.

2 - Personal Data

- Defines and differentiates between types of data, including personal, anonymous, pseudo-anonymous and special categories.

3 - Controllers and Processors

- Describes the roles and relationships of controllers and processors.

4 - Processing Personal Data

- Defines data processing and GDPR processing principles, explains the application of the GDPR and outlines the legitimate bases for processing personal data.

5 - Information Provision

- Explains controller obligations for providing information about data processing activities to data subjects and supervisory authorities.

6 - Data Subjects' Rights

- Describes data subjects' rights, applications of rights and controller and processor obligations.

7 - Security of Processing

- Discusses considerations and duties of controllers and processors for ensuring security of personal data and providing notification of data breaches.
